

Skyway Corridor Study Report

BCAG staff is currently working with the Town of Paradise and the consulting firm Whitlock & Weinberger Transportation, Inc. (W-Trans) to prepare a transportation study for the Skyway corridor.

The purpose of this study is to work with staff from the Town of Paradise and area residents, established community-based organizations (CBOs), and other stakeholders to develop a community supported plan that addresses safety, circulation, pedestrian, and aesthetic deficiencies within the corridor.

The study will focus on the segment of the Skyway in Paradise from Neal Road to Wagstaff Road. This section of the Skyway includes the downtown business district of Paradise and is completely within the Town's Redevelopment Area (RDA).
